Package Type: Carton or Wooden case

Old and New Product's Difference

Before:

- 1) Worm gear, general appearance
- 2) The previous products use with Rv50 reducer and added the splint to compose the movement. The worm gear is a consumable product. After using a long time, there will be a large gap, the pole will be not stable and shake so will cause the gear reducer to grind.
- 3) The products mainly used with AC 220V motor, the fixed speed was not adjustable.
- 4) Open structure, a low degree of protection, easy to enter water.
- 5) AC220V.
- 6) During installation, needs to adjusted the magnet position to ensure the door opening angle. After a long time, the shaking will affect the limit position or the pole may be deviated downwards.

After:

- 1) Gear transmission structure, beautiful appearance, compact structure, strong overall sense.
- 2) The new products are tailor-made for this industry and the gear adopts the processing technology of worm grinding wheel grinding after heat treatment, fine rolling of hard alloy hob, etc., the accuracy grade \geq GB / T100951, 2-2001 7 level.
- 3) The new product uses with DC brushless motor to avoid the problem of carbon brush life. Adjustable speed.
- 4) The entire seal structure, high degree of protection (\geq IP55); have a rainproof capability.
- 5) DC24V(Safe voltage)
- 6) Installed the chassis, adjust the position automatically after power on, and adjust the angle of rising pole and falling pole at will.

Company Profile

Shenzhen Chengbang Electromechanical Industry Limited is a manufacturer specializing in the production of non-standard reducers and motors for road gates, gear reduction machines, aluminum shell motors and gate motors.

We're the manufacturer of boom barrier mechanism in China more than 10 years. The current is more than 100 staffs

and 3 factories. We can customize according to customer needs.
