## Product Description

# DC-24V Work Voltage Car Park Barrier Gate For Parking Access Control Security System

## Product Description

### Overview

## Company Profile

### Product description

A boom barrier is designed for a range of max opening up to 6m. It is ideal solution for controlling vehicle traffic in parking lots, private entrances, industrial and public uses.

As a manufacturer, we have more than 10 year experiences on designing, producing and installing boom barriers. We have good quality control, so we vigorously test our boom barriers to make sure a longer life span.

### Benefits

#### 1. Long-lasting

Boom gates are incredibly strong and long-lasting. They require little maintenance and are designed to tolerate some wear and tear. Boom gates are a safe and reliable automatic security barrier since they have minimal moving parts. They are also simple to install and maintain.

#### 2. Simple exit in case of a power outage

A boom gate can be manually operated and switched to open if there is a power outage on your property. Vehicles will be able to leave quickly and safely as a result.

#### 3. Easy Integration with Security Equipment

To operate more safely and effectively, these security gates can be quickly combined with RFID, cameras that read license plates, and other access control technology. Additionally, when coupled with a number plate reader, it can restrict vehicle passage until valid authentication has been achieved. Due to the whole record being captured, this offers a second layer of protection.
