Product Description

140W Power Supply Road Safety Barrier Parking Boom Barrier Gate For Entrance And Exist

Product Description

Overview

Company Profile

Boom gates are security access barriers used to control vehicle traffic flow. They are mostly used in the parking areas of residential complexes, shopping centres, and toll booths.

Automatic boom barriers use optical sensors or motion detectors for their functionality. Additionally, these barriers use an 'amperometric device' which is designed to ensure the safety of the boom gate system through obstacle detection. This amperometric device prevents the boom arm from suddenly lowering when a vehicle is in the passage.
