## Product Description

### Product Description:

The **Automatic Barrier Gate System** is a high-performance access control solution designed for parking lots, residential communities, industrial sites, and commercial properties. Built with durable materials and advanced technology, this barrier gate ensures reliable operation, enhanced security, and smooth traffic flow management.

### Key Features:

- ✓ **Heavy-Duty Construction** – Made from robust steel/aluminum alloy with weather-resistant coating, ensuring long-term durability in harsh environments.
- ✓ **High-Speed Motor** – Provides fast and quiet lifting (open/close speed adjustable) with a lifespan of over 1 million cycles.
- ✓ **Safety Protection** – Equipped with infrared sensors to detect obstacles, auto-reverse function, and emergency manual release.
- ✓ **Customizable Length** – Arm length options from 3m to 6m (standard) with optional LED warning lights or reflective stripes.
- ✓ **Easy Installation** – Modular design with pre-drilled holes for quick setup; low maintenance requirements.

### Technical Specifications:

**Power Supply:** 220V AC / 24V DC (optional)

**Operating Temperature:** -30°C to +70°C

**Motor Power:** 100W

**Protection Level:** IP54 (dust & water resistant)

**Warranty:** 2 years (motor), 1 year (electronics)

**CBG<sup>®</sup>** Shenzhen Chengbang Electromechanical Industry Limited
