Basic Information

- Brand Name: CBG
- Certification: CE
- Model Number: 21B
- Minimum Order Quantity: 1

Product Specification

- Boom Direction: Exchangeable
- Running Speed: 1s-6s
- Boom Material: Aluminum Alloy
- Output Power: 100W
- Working Noise: <60dB
- Power: 100w
- Size: 1-4.5meters
- Warranty: 1 Year
- Highlight: Long-lasting Performance Parking Barrier,
Outdoor Parking Barrier, Indoor Parking Barrier

Product Description

Product Description:

The Parking Barrier Gate is a highly efficient and reliable automatic barrier gate designed to streamline access control in parking lots, toll booths, commercial facilities, and more. With a running speed of 1s-6s, this parking barrier ensures quick and smooth operation, allowing for swift vehicle entry and exit.

Equipped with a powerful 100W output power, the Parking Barrier Gate offers robust performance and durability, making it suitable for high-traffic environments. The barrier gate's dimensions of 280*330*1050mm provide a compact yet sturdy construction that is easy to install and maintain.

One of the standout features of the Parking Barrier Gate is its exchangeable boom direction capability, allowing for flexible installation options to suit various parking layouts and configurations. This versatility makes the barrier gate ideal for a wide range of applications, from small parking areas to large commercial complexes.

Whether you are managing a busy parking facility or looking to enhance security and access control, the Parking Barrier Gate is a reliable solution that combines speed, power, and convenience. Its automatic operation minimizes the need for manual intervention, reducing wait times and improving overall efficiency for both operators and users.

With a power consumption of 100W, the Parking Barrier Gate is energy-efficient and cost-effective, offering long-term savings on operating expenses. The barrier gate's durable construction and high-quality components ensure reliable performance in various weather conditions, making it a dependable choice for outdoor installations.

Overall, the Parking Barrier Gate is a versatile and user-friendly solution for managing vehicle access in parking facilities of all sizes. Its fast running speed, powerful output, compact dimensions, and exchangeable boom direction make it a top choice for enhancing security, efficiency, and convenience in any parking environment.

Technical Parameters:

Demension:	280*330*1050mm
Warranty:	1 Year
Interface:	RS485
Running Speed:	1s-6s
Pole Speed:	1-6s
Duty Cycle:	100%
Size:	1-4.5 meters
Ip Rate:	54
Boom Material:	Aluminum Alloy
Barrier Usage:	Outdoor Or Indoor

Applications:

The **CBG 21B S1 Automatic Barrier Gate** is a high-quality product designed for various parking management applications. With its origin in China, this barrier gate is certified with CE, ensuring its compliance with international quality standards.

Perfect for both commercial and residential use, this **Automatic Barrier Gate** is suitable for a wide range of scenarios. Its quick pole speed of 1-6 seconds makes it ideal for managing entry and exit in parking lots, residential complexes, commercial buildings, and toll booths.

The **CBG 21B S1 Parking Barrier** is a versatile solution that can be used in different environments due to its IP54 rating, which ensures protection against dust and water ingress. The output power of 100W ensures efficient operation while the dimensions of 280*330*1050mm make it suitable for various installation locations.

Whether you require a barrier gate for controlling access to a private parking lot or managing the flow of vehicles in a busy commercial area, the **CBG 21B S1** is a reliable choice. Its running speed of 1-6 seconds allows for quick and smooth operation, enhancing traffic efficiency.

With a minimum order quantity of 1, you can easily acquire this **Automatic Barrier Gate** to meet your specific needs. Enjoy the convenience and security provided by the **CBG 21B Automatic Barrier Gate** for your parking management requirements.

Customization:
