Basic Information

- Brand Name: CBG
- Certification: CE
- Model Number: 21B

Product Specification

- Special Features: Waterproof / Weatherproof
- Case Size: 250*300*990mm
- Insulation Level: F
- Motor Power: 120W
- Insulation: F
- Barrier Arm: 3/4/5/6meters
- Opening/Closing Time: 0.8-6 Seconds
- Boom Length: 1 ~ 6 Meters

Product Description

Product Description:

Introducing our Electric Boom Lift, a reliable and efficient solution for managing vehicle access in various settings. This Automatic Boom Barrier is designed to provide optimal security and convenience, making it an ideal choice for controlling traffic flow and enhancing safety measures.

With a Protection Level of IP54, this Car Park Boom Gate ensures durability and protection against dust and water ingress, ensuring consistent performance even in challenging environments. The robust construction and waterproof design make it suitable for outdoor use, offering long-lasting functionality.

The Boom Barrier features an adjustable Boom Length ranging from 1 to 6 meters, providing flexibility to accommodate different entry points and vehicle sizes. This versatility makes it suitable for a wide range of applications, from commercial facilities to residential complexes, effectively managing access control with ease.

Its Size is designed to be Standard, offering a compact and sleek profile that seamlessly integrates into various architectural settings. The Case Size of 250*300*990mm ensures a space-efficient installation while maintaining a sturdy and reliable structure.

One of the standout features of this Electric Boom Lift is its exceptional weatherproof capabilities. The Special Features of being Waterproof and Weatherproof make it a dependable choice for outdoor installations, withstanding harsh weather conditions and providing reliable operation throughout the year.

Whether you need to enhance security at a parking facility, regulate traffic at a checkpoint, or manage access at a private estate, this Automatic Boom Barrier is a versatile and dependable solution. Its durable construction, adjustable Boom Length, and weatherproof design make it an excellent choice for various access control applications.

Features:

Product Name: Boom Barrier

Barrier Arm: 3/4/5/6 meters

Material: Steel

Boom Length: 1 ~ 6 Meters

Special Features: Waterproof / Weatherproof

Protection Level: IP54

Technical Parameters:

Opening/Closing Time	0.8-6 Seconds
Barrier Arm	3/4/5/6 meters
Size	Standard
Insulation Level	F
Protection Level	IP54
Case Size	250*300*990mm
Material	Steel
Motor Power	120W
Special Features	Waterproof / Weatherproof

Applications:

The CBG 21B Automatic Boom Barrier is a reliable and efficient solution for controlling vehicle access in various scenarios. With a quick opening/closing time of 0.8-6 seconds, this Boom Parking Barrier is ideal for high-traffic areas such as parking lots, toll booths, and industrial facilities.

Originating from China, the CBG 21B Barrier Arm Gates are designed to provide seamless operation and enhanced security. The CE certification ensures that the barrier meets high-quality standards and safety regulations.

Constructed from durable steel material, this Automatic Boom Barrier offers a sturdy and long-lasting solution for access control. The IP54 protection level further enhances its durability, making it suitable for outdoor installation.

Equipped with a powerful 120W motor, the CBG 21B Boom Barrier can efficiently manage vehicle access while maintaining smooth and reliable operation. Its standard size makes it easy to integrate into various environments without compromising on performance.

Whether used in commercial parking lots, residential communities, or industrial sites, the CBG 21B Automatic Boom Barrier excels in providing secure and convenient access control. Its robust design and efficient functionality make it a versatile solution for a wide range of applications.
