Heavy Duty Automatic Barrier Gate and Motorized Parking Gate with Remote Operation and Weather Resistant Materials

Our Product Introduction

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: CBG
- Model Number: 18B-ZY
- Minimum Order Quantity: 2 pieces
- Price: $360.00/pieces 2-99 pieces
- Delivery Time: 3
- Payment Terms: T/T
- Supply Ability: 2000 Piece/Pieces per Month

Product Specification

- Highlight: **Motorized parking gate remote operation**, **Heavy duty automatic barrier gate**, **Weather resistant parking lot gate**

Product Description

Product Description:

The Automatic Barrier Gate is a state-of-the-art solution designed to enhance security, control access, and streamline vehicle management in various environments such as parking lots, residential communities, commercial complexes, and industrial facilities. As an advanced Automatic Gate Operator, this product combines robust engineering with intelligent technology to deliver reliable and efficient operation, ensuring smooth traffic flow and enhanced safety at entry and exit points.

At the core of the Automatic Barrier Gate is a powerful motorized mechanism that drives the barrier arm, enabling quick and seamless opening and closing movements. This Motorized Parking Gate is engineered for durability and precision, capable of handling heavy traffic without compromising performance. Its high-quality motor and gearbox system ensure consistent operation even under demanding conditions, making it an ideal choice for busy parking areas where efficiency and reliability are paramount.

One of the standout features of this Automatic Barrier Gate is its versatility in installation and integration. It can be easily incorporated into various access control systems, including RFID card readers, remote controls, loop detectors, and keypad entry systems, providing a comprehensive access management solution. This flexibility allows facility managers to customize the gate operation according to their specific security requirements and traffic patterns.

In addition to its functional benefits, the Automatic Barrier Gate also serves as an innovative platform for branding and advertising. The Advertising Barrier Gate variant is designed with customizable panels that can display promotional content, company logos, or community messages. This unique feature transforms the gate from a mere security device into an effective marketing tool, maximizing visibility to drivers and pedestrians alike while they wait for access authorization.

Safety is a critical consideration in the design of the Automatic Barrier Gate. The system incorporates multiple safety mechanisms such as infrared sensors, obstacle detection, and emergency stop functions to prevent accidents and damage. These features ensure that the barrier arm halts or reverses its movement upon detecting an obstruction, protecting vehicles, pedestrians, and the gate equipment itself. Furthermore, the gate's smooth and quiet operation minimizes noise pollution, contributing to a more pleasant environment.

Installation and maintenance of the Automatic Barrier Gate are straightforward, supported by detailed manuals and responsive technical assistance. The modular construction allows for easy replacement of parts and upgrades, extending the product's lifespan and maintaining optimal performance over time. Additionally, the gate's weather-resistant materials and corrosion-proof coatings guarantee durability and longevity, even in harsh outdoor conditions.

Energy efficiency is another important aspect of this Automatic Gate Operator. The intelligent control system optimizes the motor's power consumption by adjusting operation speed and standby mode based on real-time traffic demands. This not only reduces operational costs but also aligns with eco-friendly practices, making it a sustainable choice for modern facilities.

In summary, the Automatic Barrier Gate stands out as a comprehensive and multifunctional solution in the field of access control. Its combination of a powerful motorized mechanism, advanced safety features, customizable advertising options, and energy-efficient design makes it an indispensable asset for managing vehicle entry and exit with ease and sophistication. Whether deployed as a Motorized Parking Gate or an Advertising Barrier Gate, it delivers exceptional value by enhancing security, promoting brand visibility, and improving overall traffic management efficiency.

Features:

Durable and reliable Motorized Parking Gate for efficient vehicle control
Designed as an Advertising Barrier Gate to display promotional content
Automatic Entry Gate functionality for seamless access management
High-speed operation for quick vehicle passage
Robust construction suitable for various weather conditions
Easy installation and low maintenance requirements
Compatibility with multiple access control systems
Safety sensors to prevent accidents during operation
Customizable barrier arm length to fit different entry points
Energy-efficient motor for reduced power consumption

Technical Parameters:

Product Name	Automatic Security Barrier
Type	Motorized Parking Gate
System	Automated Barrier System
Power Supply	AC 220V, 50/60Hz
Motor Power	120W
Barrier Arm Length	3 to 6 meters
Opening Speed	1.5 to 6 seconds
Operating Temperature	-20°C to 70°C
Control Method	Remote control, Loop detector, Manual
Protection Level	IP54
Net Weight	45 kg

Applications:

The CBG 18B-ZY Automatic Barrier Gate, originating from Guangdong, China, is a highly efficient and reliable solution designed for various access control needs. As an advanced Automatic Gate Operator, it excels in managing vehicle entry and exit in diverse environments, ensuring smooth traffic flow and enhanced security. Its robust construction and automated functionality make it an ideal choice for both commercial and residential applications.

This Automatic Security Barrier is widely used in parking lots, gated communities, office complexes, industrial parks, and toll stations. It efficiently controls vehicle access, minimizing unauthorized entry while providing convenience to authorized users. The automated barrier system is designed to withstand high traffic volumes, making it suitable for busy locations where quick and secure access is essential. With a supply ability of 2000 pieces per month and a minimum order quantity of 2 pieces, the CBG 18B-ZY model meets the demands of large-scale installations and small projects alike.

In addition to parking management, the CBG 18B-ZY serves as a critical component in enhancing security at sensitive premises such as government buildings, hospitals, and educational institutions. Its integration with various access control devices, such as RFID readers and remote controls, enables seamless operation and monitoring. This flexibility allows the automated barrier system to adapt to different security protocols and user requirements effectively.

The product's competitive pricing at $360.00 per piece for orders between 2 and 99 units, combined with a swift delivery time of just 3 days, makes it a cost-effective and timely solution for clients worldwide. Payment terms are convenient with T/T options available, facilitating smooth transactions for both domestic and international customers.

Overall, the CBG 18B-ZY Automatic Barrier Gate is an essential Automated Barrier System that provides reliable access control, enhances security measures, and improves traffic management across a wide range of application occasions and scenarios. Whether for commercial, residential, or industrial use, it offers a perfect balance of performance, durability, and affordability.

Support and Services:

Product Technical Support and Services for the Automatic Barrier Gate

Our Automatic Barrier Gate product is designed to provide reliable and efficient access control for a variety of applications. To ensure optimal performance and longevity, we offer comprehensive technical support and services.

Technical Support:

Our dedicated support team is available to assist with installation guidance, troubleshooting, and maintenance advice. We provide detailed product manuals, wiring diagrams, and software updates to help you get the most out of your Automatic Barrier Gate system.

Installation Services:

Professional installation services are available to ensure your barrier gate is set up correctly and safely. Our certified technicians will handle site assessment, mounting, electrical connections, and initial system configuration.

Maintenance and Repair:

Regular maintenance services are recommended to keep your barrier gate operating smoothly. We offer scheduled inspections, cleaning, lubrication, and parts replacement. In case of malfunction, our repair services will quickly diagnose and fix any issues using genuine replacement parts.

Training and Consultation:

We provide training sessions for operators and maintenance personnel to familiarize them with the system's features and routine upkeep. Additionally, our experts are available for consultation to tailor solutions that meet your specific access control requirements.

Warranty and Spare Parts:

The Automatic Barrier Gate comes with a standard warranty covering manufacturing defects. We maintain an inventory of spare parts to ensure quick availability for repairs and upgrades.

For detailed information on support options and service packages, please refer to the product documentation or visit our official website.

Packing and Shipping:

Product Packaging and Shipping for Automatic Barrier Gate

The Automatic Barrier Gate is carefully packaged to ensure it arrives in perfect condition. Each unit is securely packed in a sturdy wooden crate or reinforced cardboard box, with protective foam inserts to prevent any damage during transit. All accessories, including remote controls, mounting hardware, and user manuals, are neatly organized and included within the package.

For shipping, we offer multiple options depending on customer requirements, including sea freight, air freight, and express courier services. Each shipment is tracked and handled with the utmost care to ensure timely and safe delivery. Customized packaging solutions are also available for bulk orders or specific shipping needs.

Before dispatch, every Automatic Barrier Gate undergoes thorough quality inspection and testing to guarantee optimal performance upon arrival. We strive to provide reliable packaging and shipping services to support a smooth installation process for our customers worldwide.

FAQ:

Q1: What is the brand and model number of the Automatic Barrier Gate?
A1: The Automatic Barrier Gate is from the brand CBG, and the model number is 18B-ZY.
Q2: Where is the Automatic Barrier Gate manufactured?
A2: The Automatic Barrier Gate is manufactured in Guangdong, China.
Q3: What is the minimum order quantity for this product?
A3: The minimum order quantity for the CBG 18B-ZY Automatic Barrier Gate is 2 pieces.
Q4: What are the payment terms for purchasing the Automatic Barrier Gate?
A4: The payment terms for this product are T/T (Telegraphic Transfer).
Q5: How many pieces can you supply per month, and what is the delivery time?
A5: We have a supply ability of 2000 pieces per month, and the delivery time is approximately 3 days.
Q6: What is the price per piece for ordering between 2 to 99 pieces?
A6: The price for ordering between 2 to 99 pieces is $360.00 per piece.
