Product Description

Product Description:

The Automatic Barrier Gate is an advanced and reliable solution designed to enhance security and manage vehicle access efficiently in various environments. As an Automatic Security Barrier, it offers superior control over entry and exit points, making it ideal for parking lots, residential complexes, commercial buildings, industrial sites, and other restricted areas. Engineered with precision and durability in mind, this barrier gate combines cutting-edge technology with robust construction to provide seamless operation and long-lasting performance.

One of the key features of this Automatic Security Barrier is its automated mechanism that allows for quick and smooth barrier arm movement. This reduces waiting times and improves traffic flow, ensuring a hassle-free experience for both administrators and users. The gate can be integrated with a variety of access control systems such as RFID readers, remote controls, ticket dispensers, and biometric scanners, enhancing security by allowing authorized personnel or vehicles to pass while preventing unauthorized access.

In addition to its primary function as a security device, this Automatic Barrier Gate can also serve as an Advertising Barrier Gate. The barrier arm can be customized with vibrant advertisements, logos, or promotional messages, turning a routine security checkpoint into an effective marketing platform. This unique dual functionality not only maximizes the utility of the barrier but also provides businesses with an innovative way to increase brand visibility in high-traffic areas.

Constructed from high-quality materials, the Automatic Security Barrier is resistant to harsh weather conditions and vandalism, ensuring reliable performance in both indoor and outdoor settings. Its sturdy frame and corrosion-resistant components guarantee durability, reducing maintenance costs and downtime. The gate's design also includes safety features such as obstacle detection and automatic stop mechanisms to prevent accidents and damage to vehicles or pedestrians.

Installation of the Automatic Security Barrier is straightforward, and the system is compatible with various power sources, including mains electricity and solar power options, catering to different site requirements. The control panel is user-friendly, allowing easy programming and customization to suit specific operational needs. Furthermore, the barrier gate supports both manual and automatic modes, providing flexibility in different scenarios.

Energy efficiency is another significant aspect of this Automatic Security Barrier. Its low power consumption design helps reduce operational costs while maintaining optimal performance. The noise level during operation is minimal, making it suitable for environments where quiet operation is essential, such as residential areas or corporate campuses.

Overall, the Automatic Barrier Gate stands out as a versatile and effective solution for managing vehicle access and enhancing security. Whether used as a standalone Automatic Security Barrier or as an Advertising Barrier Gate, it offers a combination of functionality, durability, and aesthetic appeal. Its ability to integrate with modern access control technologies and support advertising makes it an excellent investment for businesses and organizations seeking to improve safety while leveraging marketing opportunities.

In summary, this Automatic Security Barrier provides a comprehensive approach to access control by combining advanced automation, robust security features, and advertising potential. It ensures smooth traffic management, enhances perimeter security, and contributes to brand promotion, making it a valuable asset in any security infrastructure. With its reliable performance and multifunctional capabilities, the Automatic Barrier Gate is a smart choice for modern security and marketing needs.

Features:

- High-quality Motorized Parking Gate for efficient vehicle control
- Durable and reliable Automatic Security Barrier for enhanced safety
- Integrated Advertising Barrier Gate option for promotional displays
- Fast and smooth barrier arm operation with advanced motor technology
- Easy installation and low maintenance design
- Weather-resistant construction suitable for outdoor environments
- Multiple control options including remote, keypad, and sensor activation
- Customizable barrier arm length to fit various entry points
- Energy-efficient motor system reducing power consumption
- Compatible with access control systems for seamless integration

Technical Parameters:

Product Type	Automatic Security Barrier
Function	Automatic Entry Gate
Barrier Type	LED Boom Automatic Vehicle Barrier
Operating Voltage	AC 220V ±10%
Power Consumption	120W
Opening/Closing Time	3-6 seconds
Boom Length	3 to 6 meters
Operating Temperature	-40°C to 75°C
Working Humidity	0% to 90% (non-condensing)
Control Method	Remote control, Loop detector, Infrared sensor
Material	Steel housing with LED boom

Net Weight	Approximately 35 kg

Applications:

The CBG 18B-ZY Automatic Barrier Gate, originating from Guangdong, China, is a highly reliable and efficient Automated Barrier System designed to enhance security and traffic management in a variety of settings. This premium product is perfect for controlling vehicle access in both private and public areas, ensuring smooth and secure passage for authorized vehicles while preventing unauthorized entry.

One of the most common application occasions for the CBG 18B-ZY is in parking lots of commercial complexes, residential communities, and office buildings. Its Electric Vehicle Barrier feature allows for quick and seamless vehicle identification and access control, reducing congestion and enhancing the overall user experience. The automatic operation ensures minimal human intervention, making it an excellent choice for high-traffic areas where efficiency and security are paramount.

Another ideal scenario for deploying this Automatic Security Barrier is at toll plazas and highway entrances. The robust design and rapid response time of the CBG 18B-ZY model facilitate smooth traffic flow while maintaining strict security protocols. This barrier system is also suitable for industrial sites and logistics centers where controlled vehicle entry is essential to safeguard assets and personnel.

The CBG 18B-ZY is designed to support a supply ability of 2000 pieces per month, with a minimum order quantity of just 2 pieces, making it accessible for both large-scale projects and smaller installations. Payment terms are flexible with T/T accepted, and delivery time is efficiently managed within 3 days, ensuring prompt deployment. Pricing is competitive at $360.00 per piece for orders between 2 and 99 units, offering excellent value for a high-quality Automated Barrier System.

Whether it's for enhancing security at gated communities, managing access at corporate campuses, or streamlining operations at transportation hubs, the CBG 18B-ZY Automatic Barrier Gate stands out as a dependable and cost-effective solution. Its advanced technology, ease of installation, and durable build make it a smart investment for any scenario requiring an Electric Vehicle Barrier or Automatic Security Barrier system.

Support and Services:

Thank you for choosing our Automatic Barrier Gate. To ensure optimal performance and longevity of your product, please follow the guidelines below for technical support and services.

Installation Support: Our Automatic Barrier Gate is designed for easy installation. Please refer to the user manual for detailed installation instructions. If you encounter any difficulties during installation, consult the troubleshooting section or visit our online support center for additional resources.

Maintenance Services: Regular maintenance is essential to keep your barrier gate functioning smoothly. Clean the barrier arm and housing periodically to remove dust and debris. Lubricate moving parts as recommended in the user manual. Schedule professional maintenance annually to check electrical components and mechanical parts.

Troubleshooting: Common issues such as the barrier not opening or closing properly, unusual noises, or sensor malfunctions can often be resolved by checking the power supply, ensuring the path is clear, and resetting the system. Refer to the troubleshooting guide in the manual for step-by-step solutions.

Software Updates: Our Automatic Barrier Gate may include firmware that can be updated to enhance functionality and security. Check our website regularly for the latest software updates and installation instructions.

Warranty and Repairs: The product comes with a warranty that covers manufacturing defects and certain malfunctions. Please review the warranty terms in the user manual. For repairs beyond basic troubleshooting, contact authorized service centers to ensure genuine parts and expert service.

For detailed support, downloadable manuals, FAQs, and instructional videos, please visit our official support website.

Packing and Shipping:

Product Packaging:

The Automatic Barrier Gate is securely packed using high-quality, durable materials to ensure protection during transit. Each unit is wrapped in anti-static foam and enclosed in a sturdy cardboard box designed to prevent impact damage. The packaging includes all necessary accessories, installation manuals, and warranty documents neatly organized within the box. Additionally, the outer packaging is clearly labeled with product information, handling instructions, and safety warnings.

Shipping:

We offer reliable shipping options to deliver the Automatic Barrier Gate safely to your location. The product is shipped via trusted carriers with tracking available for every order. Standard shipping ensures delivery within 7-14 business days, while expedited shipping options are available for faster delivery. All shipments are insured against loss or damage during transit. For international orders, customs documentation is included to facilitate smooth clearance.

FAQ:

Q1: What is the brand and model number of the Automatic Barrier Gate?

A1: The Automatic Barrier Gate is from the brand CBG, and the model number is 18B-ZY.

Q2: Where is the Automatic Barrier Gate manufactured?

A2: This product is made in Guangdong, China.

Q3: What is the minimum order quantity for the Automatic Barrier Gate?

A3: The minimum order quantity is 2 pieces.

Q4: What payment terms are accepted for purchasing the Automatic Barrier Gate?

A4: Payment is accepted via T/T (Telegraphic Transfer).

Q5: How many Automatic Barrier Gates can you supply per month, and what is the delivery time?

A5: We have a supply ability of 2000 pieces per month, and the delivery time for orders is 3 days.

Q6: What is the price of the Automatic Barrier Gate?

A6: The price is $360.00 per piece for orders between 2 and 99 pieces.
