Product Description

Product Description:

The Automatic Barrier Gate is a state-of-the-art solution designed to enhance security, streamline access control, and improve traffic management in various environments such as parking lots, residential complexes, commercial buildings, and industrial facilities. This advanced Automatic Gate Operator integrates cutting-edge technology with robust construction to provide reliable and efficient barrier control, making it an indispensable asset for modern access management systems.

One of the standout features of this Automatic Barrier Gate is its incorporation of LED Advertising capabilities. The LED Advertising Automatic Parking Barrier not only serves as a physical barrier to control vehicle entry and exit but also doubles as an effective advertising platform. The high-resolution LED display embedded in the barrier arm allows businesses and property managers to showcase dynamic advertisements, announcements, or promotional content, turning a functional gate into a versatile marketing tool. This dual functionality maximizes the utility of the gate, providing value beyond traditional access control.

Engineered for durability and performance, the Automatic Gate Operator boasts a robust construction made from high-quality materials that ensure long-lasting operation even in harsh weather conditions. The barrier arm is designed to withstand impacts and resist corrosion, making it suitable for outdoor installations. Its smooth and quiet operation reduces noise pollution, enhancing the overall user experience for both drivers and pedestrians. Additionally, the gate features a fast and responsive mechanism that allows for quick opening and closing, thereby minimizing wait times and improving traffic flow.

The LED Advertising Automatic Parking Barrier is equipped with intelligent control systems that support a wide range of access methods. These include remote controls, RFID cards, loop detectors, and even integration with smart parking management software. This flexibility allows the gate to adapt to different operational requirements, whether it's managing a private parking area or controlling access to a commercial facility. The system's automation capabilities reduce the need for manual intervention, lowering operational costs and increasing security by minimizing human error.

Safety is a paramount consideration in the design of the Automatic Barrier Gate. It includes advanced safety features such as obstacle detection sensors that prevent the barrier arm from closing if a vehicle or pedestrian is detected in its path. This ensures the prevention of accidents and damage to vehicles. Furthermore, the gate is equipped with emergency release mechanisms that allow manual operation during power outages or system failures, ensuring continuous access control under all circumstances.

Installation and maintenance of the Automatic Gate Operator are straightforward, thanks to its modular design and user-friendly interface. The gate can be customized to fit various entry widths and configured to meet specific site requirements. The LED Advertising Automatic Parking Barrier also offers programmable display options for the LED screen, enabling easy updates and changes to advertising content without the need for additional hardware.

In summary, the Automatic Barrier Gate combines functionality, security, and marketing innovation in one comprehensive package. Its role as an Automatic Gate Operator ensures efficient and secure vehicle access control, while the integrated LED Advertising Automatic Parking Barrier feature transforms the gate into a dynamic advertising medium. This blend of technology and practicality makes it an ideal choice for businesses and organizations seeking to optimize their access control systems while leveraging advertising opportunities. Investing in this Automatic Barrier Gate means securing your premises, enhancing user convenience, and creating new revenue streams through targeted advertising, all with a single, elegant solution.

Features:

High-quality Automated Barrier System for efficient access control
Durable construction ensuring long-lasting performance
Fast and smooth operation with electric motor technology
Suitable for various applications including parking lots and restricted areas
Electric Vehicle Barrier compatible for modern transportation needs
Easy installation and low maintenance requirements
Safety features including obstacle detection and emergency release
Remote control and manual operation options available
Energy-efficient design reducing operational costs
Customizable barrier arm length to fit specific site requirements

Technical Parameters:

Product Name	LED Advertising Automatic Parking Barrier
Type	Automatic Gate Operator
Application	Automatic Entry Gate
Barrier Arm Length	3 to 6 meters
Operating Voltage	AC 220V ±10%
Power Consumption	120W
Opening/Closing Time	3 to 6 seconds
LED Display	Full-color LED Advertising Screen
Control Method	Remote control, Loop detector, Infrared sensor
Operating Temperature	-40°C to +75°C
Protection Level	IP54

Material	Cold-rolled steel with powder coating
Dimensions (L x W x H)	1100mm x 280mm x 380mm
Net Weight	35 kg

Applications:

The CBG 18B-ZY Automatic Barrier Gate, originating from Guangdong, China, is an innovative solution designed to enhance security and streamline vehicle access control in various settings. This advertising barrier gate is not only functional but also serves as a dynamic advertising platform, featuring bright LED displays that can showcase promotional content, making it an ideal choice for businesses aiming to combine security with marketing.
This electric vehicle barrier is widely applicable in numerous scenarios such as commercial parking lots, residential communities, office complexes, and public facilities. Its robust design and reliable performance ensure smooth operation even in high-traffic areas, helping to control vehicle entry and exit efficiently. The 18B-ZY model's LED advertising capabilities transform a standard parking barrier into a powerful communication tool, attracting attention and delivering messages effectively to drivers and pedestrians alike.
Another prominent application of the CBG 18B-ZY is in automated parking systems, where it acts as an LED advertising automatic parking barrier. This integration not only improves parking management but also offers an excellent opportunity for businesses to display advertisements or important announcements directly to vehicle owners. The gate's automation reduces the need for manual intervention, enhancing convenience and security while promoting brand visibility.
With a minimum order quantity of just 2 pieces and a competitive price of $360.00 per piece for orders between 2 to 99 pieces, this product is accessible for small to large-scale projects. Payment terms are flexible, with T/T accepted, and a supply ability of 2000 pieces per month ensures timely delivery. The delivery time is approximately 3 days, making it a reliable option for urgent installations.
In summary, the CBG 18B-ZY Automatic Barrier Gate is an excellent choice for anyone looking for a multifunctional solution that combines vehicle access control with advertising potential. Whether used as an advertising barrier gate, electric vehicle barrier, or LED advertising automatic parking barrier, it offers durability, efficiency, and promotional advantages in one advanced package.

Support and Services:

Our Automatic Barrier Gate product is designed to provide efficient and reliable access control for parking lots, toll booths, and secured areas. For optimal performance, please ensure proper installation according to the user manual and use the recommended power supply. If you experience any issues with the barrier gate operation, such as failure to open or close, unusual noises, or sensor malfunctions, please refer to the troubleshooting section of the manual. Common solutions include checking the power connections, ensuring the safety sensors are clean and unobstructed, and verifying the control settings.
Regular maintenance is essential to prolong the life of your Automatic Barrier Gate. We recommend periodic inspection and cleaning of mechanical parts, lubrication of moving components, and testing of safety features. Avoid exposure to extreme weather conditions without adequate protection.
For software updates and firmware upgrades, please visit our official website to download the latest versions compatible with your product model. Keeping the system up to date ensures improved functionality and security.
Our technical support team is available to assist you with installation guidance, troubleshooting, and spare parts replacement. Please have your product model number and purchase details ready when seeking support to facilitate a faster resolution.
We are committed to providing high-quality service and support to ensure your Automatic Barrier Gate operates smoothly and meets your access control needs.

Packing and Shipping:

Product Packaging and Shipping for Automatic Barrier Gate
The Automatic Barrier Gate is carefully packed to ensure it reaches you in perfect condition. Each unit is securely wrapped with protective materials such as foam and bubble wrap to prevent any damage during transit. The barrier gate components are placed in a sturdy, custom-designed cardboard box that is clearly labeled with handling instructions.
For shipping, we use reliable logistics partners to guarantee timely delivery. The package is sealed and strapped to avoid any movement inside the box. Depending on your location and preference, we offer multiple shipping options including standard, expedited, and freight services.
Before dispatch, every Automatic Barrier Gate undergoes a thorough quality inspection and functional test to ensure it meets our high standards. Tracking information will be provided once your order has shipped, allowing you to monitor the delivery status in real-time.
If you have any special packaging or shipping requirements, please contact our customer service team, and we will do our best to accommodate your needs.

FAQ:

Q1: What is the brand and model number of the Automatic Barrier Gate?
A1: The Automatic Barrier Gate is from the brand CBG, and the model number is 18B-ZY.
Q2: Where is the Automatic Barrier Gate manufactured?
A2: The Automatic Barrier Gate is manufactured in Guangdong, China.
Q3: What is the minimum order quantity for this product?
A3: The minimum order quantity for the CBG 18B-ZY Automatic Barrier Gate is 2 pieces.
Q4: What payment terms are accepted for purchasing the Automatic Barrier Gate?
A4: The accepted payment term for this product is T/T (Telegraphic Transfer).
Q5: What is the price and supply capacity of the Automatic Barrier Gate?
A5: The price is $360.00 per piece for orders between 2 and 99 pieces. The supply ability is 2000 pieces per month.
Q6: How long is the delivery time for the Automatic Barrier Gate after placing an order?
A6: The delivery time is 3 days after the order is confirmed.
